How to execute your program

Makefile:

$make sender

$make receiver

$make agent

$make player
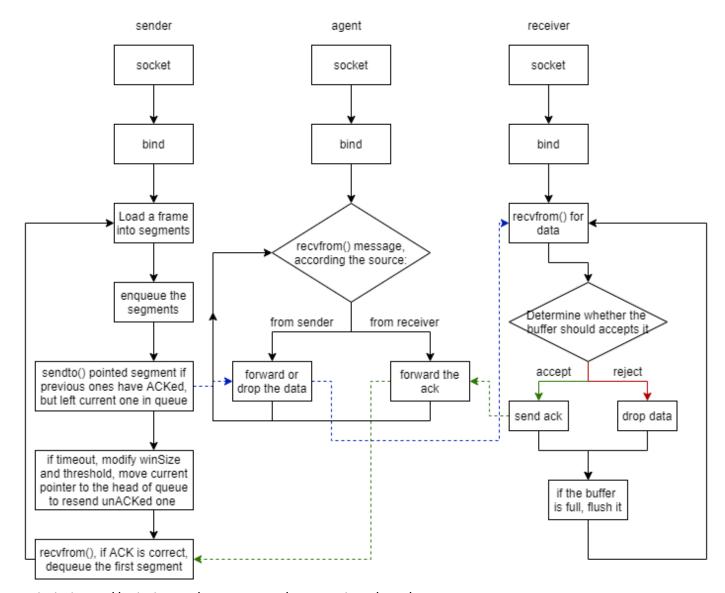

or

$make

Execute:

1. $./agent [sender IP] [receiver IP] [sender port] [agent port] [recv port] [loss_rate]
2. $./receiver [agent IP] [agent port] [receiver port]
3. $./sender [agent IP] [agent port] [sender port][video_name]

Explain your program structure
